Objective

Motivated and detail-oriented third-year (3rd year) B.Tech student specializing in Computer Science and Information Technology (CSIT) with skills in web development, Python, DSA and data analysis to contribute to innovative projects. Eager to apply problem-solving abilities in collaborative real-world projects while enhancing technical and interpersonal skills.

Education

Institute of Engineering and Science IPS Academy, Indore — *Expected Graduation: May 2027*
Bachelor of Technology in Computer Science and Information Technology

- Overall CGPA: 9.30 (till 4th semester)
- Relevant Coursework: Introduction to Computer Science, Data Structures and Algorithms, Web Development Fundamentals, Python Programming, Java, C and C++ Programming, Object-Oriented Programming.

Skills

- **Web Development:**
  - Proficient in HTML, CSS, JavaScript and React for building responsive and dynamic websites.
- **Frameworks and Tools:**
  - Experience with version control (Git, GitHub) for collaboration and code management.
  - Familiarity with Figma and graphic design tools for UI/UX design.
- **Data Science and Algorithms:**
  - Strong foundation in DSA using C++ with experience in solving coding challenges on platforms like LeetCode, Codeforces, GeeksforGeeks, HackerRank etc.
  - Excellent logical thinking and problem-solving skills developed through continuous practice.
- **Other Skills:**
  - Excellent communication skills for effective team collaboration.
  - Strong critical thinking and problem-solving abilities.
  - Basic knowledge of MySQL and Python.

Experience

Web Development Intern — *Indore, MP June 2024 – September 2024*
ROOMZY

- Contributed to web development projects, focusing on responsive design using HTML, CSS, and JavaScript.
- Utilized Figma for graphic design and prototyping.
- Worked on various projects to enhance user experience and functionality.

Achievements and Hackathon Participation

- Participated in Vultr Cloud Innovate Hackathon 2024, built AI-based cloud solutions.
- Took part in Amazon Smbhav Hackathon 2024, worked on retail-tech innovations.
- Competed in Myntra TrendHack 2024, developed AI-powered fashion solutions.
- Engaged in Smart India Hackathon (SIH) 2024, solved real-world student career guidance problem.
- Participated in Accenture Innovation Challenge 2024, focused on AI for sustainability.
- Regular participant in coding contests and DSA challenges on various platforms.
